

# THINK SMART

# SAVE YOUR WATER

TOILET FLUSH = 5 TO 7 GALLONS

SHOWER = 25 TO 50 GALLONS

HANDWASHING = 2 GALLONS WITH RUNNING TAP

TOOTHBRUSHING = 2 GALLONS WITH RUNNING TAP

OUTDOOR WATERING = 5 TO 10 GALLONS PER MINUTE

AUTOMATIC DISHWASHER = 10 GALLONS

DISHWASHING BY HAND = 20 GALLONS

TUB BATH = 36 GALLONS

To save on some of these water uses everyday:

- Use brooms to sweep the sidewalk, not a water hose.
- Position sprinklers so they only water the lawn, not the sidewalk.
- Toilets are the biggest water-wasters. Low-flush or air-assisted toilets cut toilet water up to 90%, or put a brick in your tank!
- Turn off water while you are brushing your teeth, washing your hands or even scraping dishes.
